

0:0:0.0 --> 0:0:0.350

INTERVIEWER - MW
OK.

0:0:1.870 --> 0:0:2.810

INTERVIEWER - MW
Ready to rock.

0:0:4.90 --> 0:0:6.430

INTERVIEWER - MW
So first question I have for you:

0:0:7.230 --> 0:0:9.770

INTERVIEWER - MW
What does occupational stress mean to you?

0:0:13.220 --> 0:0:25.480

FR04

To me it means that when you go into work, there are stressors that also you're taking home with you, so you're being caused to have

0:0:26.650 --> 0:0:32.950

FR04

Stress that's outside of your home life or anything like that solely based on work.

0:0:36.60 --> 0:0:37.320

INTERVIEWER - MW
Describe some of those for us.

0:0:38.170 --> 0:0:40.450

INTERVIEWER - MW
Are those manifesting in your

0:0:41.320 --> 0:0:42.330

INTERVIEWER - MW
In your day-to-day?

0:0:43.50 --> 0:0:43.510

FR04

Mm-hmm.

0:0:52.130 --> 0:0:55.600

FR04

You kind of cut out and it's kind of lagging real quick, so.

0:0:56.600 --> 0:0:57.170

INTERVIEWER - MW
Uh, sorry.

0:0:56.450 --> 0:0:57.500

FR04

Could you repeat?

0:0:58.800 --> 0:1:4.140

INTERVIEWER - MW

Yeah. Describe some of those for us and how they manifested in your day-to-day.

0:1:4.610 --> 0:1:7.40

FR04

Yeah. So.

0:1:7.880 --> 0:1:20.130

FR04

Something I think that's always always there whenever you're working in a medical field is like the teamwork, because it's not only one person, and so a lot of times

0:1:20.890 --> 0:1:26.560

FR04

I will get stressed from working with other people and kind of the stress in there that they

0:1:28.960 --> 0:1:39.540

FR04

From bad work habits or you know, the little high school type things that everybody does, talking, all of the gossip and drama.

0:1:40.740 --> 0:1:49.350

FR04

But also I mean anytime that there is a patient that I have to treat, that's a rough call,

0:1:51.470 --> 0:1:58.980

FR04

I definitely tend to take that home. I try not to try to talk about it, but I feel like that's pretty

0:2:0.130 --> 0:2:4.750

FR04

Pretty common as well to just kind of take those rough calls with you.

0:2:5.210 --> 0:2:8.930

FR04

Umm, especially in EMS but

0:2:10.90 --> 0:2:14.60

FR04

I would say those are kind of the two main like stressors.

0:2:24.140 --> 0:2:25.130

FR04

Yeah. So.

0:2:16.580 --> 0:2:25.430

INTERVIEWER - MW

Rough call. That's a that's a pleasant way to put it. How would you describe like, what is, what does that look like to someone like me? And they, what do you consider?

0:2:25.210 --> 0:2:28.840

FR04

Umm, I'll give you an example I

0:2:30.540 --> 0:2:44.650

FR04

I just this past week I work for a private company, so we go to nursing homes and I walked into start an IV on a patient

0:2:46.100 --> 0:3:5.850

FR04

And I thought that the patient needed to go to the hospital, but the patient couldn't make that decision for themselves and their power of attorney said no. And so I had to walk away and say, OK, because of legal reasons, even though my medical judgment said that this person needed help.

0:3:6.930 --> 0:3:10.120

FR04

But when it's somebody making the decision

0:3:11.390 --> 0:3:18.180

FR04

For that person, because of X, Y, or Z or personal wishes or whatever those type of calls

0:3:18.840 --> 0:3:20.880

FR04

Are rough because I know I could have helped.

0:3:22.180 --> 0:3:25.610

FR04

And then I walk away and I'm like, well, I have no idea what's gonna happen to this person.

0:3:26.130 --> 0:3:29.40

FR04

Umm. Or taking a

0:3:30.520 --> 0:3:32.690

FR04

Cardiac arrest that doesn't turn out well.

0:3:33.850 --> 0:3:52.780

FR04

Umm, those are always rough. Just knowing that, like you did everything you could, but we in EMS have very bad sense of humor and can kind of brush it off, but I think it stays in the back of our heads like, yeah, I did everything I could, but that person still

0:3:53.890 --> 0:3:54.950

FR04

Died in the end.

0:3:55.850 --> 0:3:58.950

FR04

Umm. And having somebody's life in your hands.

0:4:2.370 --> 0:4:5.500

INTERVIEWER - MW

How are you co-? Like, what are your mechanisms now to

0:4:6.330 --> 0:4:8.330

INTERVIEWER - MW

To help cope with that, what are those?

0:4:10.470 --> 0:4:11.700

FR04

The people that I work with

0:4:12.940 --> 0:4:19.50

FR04

When we have like something rough, we talk about it almost right away and that helps a lot.

0:4:20.960 --> 0:4:23.540

FR04

I think a lot of us will

0:4:24.870 --> 0:4:50.840

FR04

And myself included, will kind of shove it back into the back of our brains and not really know that we're doing it. And so we'll just kind of we joke about things. If you have ever, probably not but if you walk past a cardiac arrest happening at a hospital, you'll see nurses, doctors, all of that. And they might be like joking with one another because it's our coping mechanism.

0:4:52.700 --> 0:4:58.620

FR04

And we might not even know that we're doing it just because it's it's something that if we didn't do, we'd be crying all day.

0:4:59.380 --> 0:5:0.60

FR04

Umm.

0:5:0.870 --> 0:5:7.720

FR04

And then personally, I I will come home and talk to my husband and be like, hey, this happened like

0:5:9.340 --> 0:5:15.460

FR04

And just talk it out. I think talking through those hard times has been what's been most beneficial for me.

0:5:18.860 --> 0:5:25.570

INTERVIEWER - MW

Would you describe like what the rough calls or those scenarios where you feel overwhelmed during the job or not necessarily, how would you?

0:5:26.110 --> 0:5:36.980

FR04

Not necessarily, because it it is a part of the job and then it is something that if you work in EMS then you

0:5:37.730 --> 0:5:47.120

FR04

You thrive off the adrenaline. It's more of the the after the fact. You're it kind of sets in and you're like ohh wow, that happened.

0:5:47.600 --> 0:5:48.320

FR04

Umm.

0:5:49.770 --> 0:6:7.760

FR04

But I would say during it it's just it's all all your thoughts go away and it is muscle memory. You know what to do. You know how to treat this person, you are almost mechanical, but not because there's a lot of like critical thinking involved but

0:6:9.400 --> 0:6:12.210

FR04

It's almost automatic.

0:6:13.150 --> 0:6:13.660

INTERVIEWER - MW

Yeah.

0:6:13.470 --> 0:6:14.400

FR04

In those moments.

0:6:15.520 --> 0:6:20.170

INTERVIEWER - MW

Can you think of a time or describe a time where you felt overwhelmed during the job?

0:6:22.730 --> 0:6:33.290

FR04

I think I personally I don't feel overwhelmed as much with patients, but more within interactions with

0:6:33.960 --> 0:6:58.660

FR04

One another or talking about well, you probably should have done this because I learned it this way, but I'm like I learned it in a completely different way, and what's what's the proper way to go about this situation? Those are where I feel overwhelmed rather than the really bad calls or the really like rough things or things with a patient. It's more of the aftermath.

0:6:59.440 --> 0:7:1.270

FR04

Or like just

0:7:2.510 --> 0:7:10.440

FR04

The traditional like feeling overwhelmed with gossip and things like that within the workplace, which you have in any workplace, no matter where you are.

0:7:13.350 --> 0:7:17.250

INTERVIEWER - MW

What would be helpful for you from a stress reduction standpoint while on the job?

0:7:21.830 --> 0:7:23.320

FR04

While on the job,

0:7:24.700 --> 0:7:36.820

FR04

I think debriefing and using strategies to debrief is really good, something that we don't really do often at where I work

0:7:37.260 --> 0:7:52.950

FR04

Umm is like having a full conversation of "OK what happened? How can we relax?" Maybe after a call having like a period to be able to just like calm yourself rather than just going right to the next thing.

0:7:53.370 --> 0:7:59.290

FR04

Umm, because that's more often what we do, we have a rough call, we hand it off to the hospital and then we

0:8:0.40 --> 0:8:1.930

FR04

Get right back on the road and go to another one.

0:8:2.470 --> 0:8:2.750

INTERVIEWER - MW

Umm.

0:8:2.490 --> 0:8:7.510

FR04

Umm. And there's no there's almost no time to process.

0:8:9.230 --> 0:8:23.230

FR04

So and then we get stuck putting it in the back of our head. And I think having that time to like be able to just take 5 minutes to relax, maybe do like a breathing exercise or something

0:8:24.0 --> 0:8:29.730

FR04

To have that as a norm rather than just going and going to the next one.

0:8:31.120 --> 0:8:31.610

INTERVIEWER - MW

Yeah.

0:8:32.520 --> 0:8:41.240

INTERVIEWER - MW

So currently what opportunities do you see for incorporating well-being resources into your daily workflow? You mentioned some of them that are there any other

0:8:42.670 --> 0:8:44.920

INTERVIEWER - MW

Specific means in which you would go about doing that?

0:8:48.70 --> 0:9:6.950

FR04

Because of the nature of the like, personally I highly enjoy like yoga and meditation. But because of the job and its nature itself, it's so hard to like structure that in. And so I think it really has to be something that is a

0:9:8.140 --> 0:9:8.500

FR04

Like.

0:9:10.90 --> 0:9:25.890

FR04

Maybe a personal goal of individuals or through education rather than like or maybe like an app or something that people could just, hey, we're taking five minutes and do this or do that.

0:9:26.160 --> 0:9:37.570

FR04

Umm, because we don't have the opportunity really to say, hey, we're gonna do like staff yoga during lunch or something, you know, because we don't have that.

0:9:38.50 --> 0:9:41.0

FR04

Umm, because there is no lunchtime, so it it

0:9:41.970 --> 0:9:49.480

FR04

Makes it hard, I think, to incorporate things that are are not things that you could just do on your own in a quick manner.

0:9:51.70 --> 0:9:51.630

INTERVIEWER - MW

(inaudible)

0:9:52.400 --> 0:9:57.510

INTERVIEWER - MW

Any other barriers that you see playing a role in bringing well-being resources to your workplace?

0:9:58.190 --> 0:9:59.440

FR04

I think

0:9:59.530 --> 0:10:5.420

FR04

Um with EMS personally like them in all

0:10:5.610 --> 0:10:7.590

FR04

Umm, they're very

0:10:9.150 --> 0:10:13.560

FR04

We are a group of people who like to handle things on our own.

0:10:14.870 --> 0:10:23.20

FR04

Umm. And I think trying to say "hey, you should like, meditate or you should do this" people will give pushback.

0:10:23.650 --> 0:10:26.240

FR04

But it all depends on a

0:10:26.970 --> 0:10:32.270

FR04

Like who your audience is like who that conversations happening with because

0:10:33.280 --> 0:10:38.440

FR04

In my workplace we have fairly young people and so I feel like

0:10:39.510 --> 0:11:8.900

FR04

A lot of them are like college students who do that type of stuff already, but then if it's at with like a

department or a like a fire or EMS specific 911 service, a lot of those people are like older and have get stuck in ways and things like that, that it's more often than not, they're like, well, don't touch me, something's wrong with me type of situation.

0:11:9.450 --> 0:11:9.690

FR04

You.

0:11:11.960 --> 0:11:16.590

FR04

Yeah, I think that would be the biggest barrier is like getting people to actually buy in.

0:11:18.100 --> 0:11:20.40

INTERVIEWER - MW

Yeah, I can see that for sure.

0:11:21.230 --> 0:11:29.750

INTERVIEWER - MW

It's kind of taking aside here, coming back, what, if any, type of like you deal with any chronic work-related pains, anything in here?

0:11:30.330 --> 0:11:39.700

FR04

Umm, no, not specifically work-related. I did have a a shoulder injury that was

0:11:40.630 --> 0:11:40.970

FR04

Like

0:11:41.880 --> 0:11:54.950

FR04

Exacerbated by work, but not solely work. It was also sports, but I I had it surgically fixed, but that was more of just all of that. So I personally have never had back

0:11:55.620 --> 0:12:0.550

FR04

Like injuries, but a lot of people within EMS get back injuries

0:12:1.770 --> 0:12:6.760

FR04

With lifting and we have to lift and move patients all the time.

0:12:8.10 --> 0:12:11.630

FR04

And so a focus on body mechanics is really big, but.

0:12:15.60 --> 0:12:18.490

FR04

Personally, I have not had any injuries knock on wood.

0:12:19.560 --> 0:12:19.970

INTERVIEWER - MW

I mean.

0:12:21.330 --> 0:12:27.190

INTERVIEWER - MW

How would you describe it as like it's pretty physical, you know, based on your like, how would you classify that?

0:12:28.0 --> 0:12:28.450

FR04

Um.

0:12:29.780 --> 0:12:31.890

FR04

So I would classify it as

0:12:32.960 --> 0:12:35.250

FR04

Physical yes,

0:12:36.70 --> 0:12:51.260

FR04

Dependent on the amount of calls, because in EMS we never know how many calls we're gonna have, right? And that could be one call and 12 hours where you're lifting one person or it could be.

0:12:52.590 --> 0:12:57.90

FR04

8 calls in 12 hours and your non-stop moving going.

0:12:57.740 --> 0:13:0.950

FR04

All of that. So I think it all depends on the day.

0:13:1.290 --> 0:13:14.700

FR04

Umm, but we do regularly pick people up, move people, slide them, roll them. And so if you're getting up to those bariatric patients who are six, seven hundred pounds.

0:13:15.980 --> 0:13:21.530

FR04

It can get very, very difficult and physical in nature.

0:13:22.400 --> 0:13:35.250

FR04

And also some of the some of the you know like if for like a cardiac arrest for example doing those type of skills and compressions and all of that those are very, very physical activity

0:13:36.180 --> 0:13:38.230

FR04

Umm things.

0:13:40.310 --> 0:13:56.610

INTERVIEWER - MW

Is- I'm curious, is it like a point of emphasis? Like if so, if you're just on the, you work for a company that's EMS EMT specific, not associated with like a fire department, are they emphasizing the the physical fitness of it or or how's that even really OK?

0:13:54.400 --> 0:13:57.290

FR04

No, no, no. So.

0:14:4.50 --> 0:14:4.460

INTERVIEWER - MW

Mm-hmm.

0:13:58.940 --> 0:14:5.710

FR04

Because so where I work it's EMS only and it is

0:14:7.420 --> 0:14:38.90

FR04

We work 12 hours. We don't do like full 24 hour shifts, but we do 3 twelves a week or more than that. Some people do 13 1/2 hour shifts, 3 * a week and there's no most. There's no emphasis on hey, you should go workout or we don't have like a workout area. We don't have like any literally anything around that at all. Unlike a fire department who is like, you have to work out on shift.

0:14:38.160 --> 0:14:40.140

FR04

Or, you know, things like that.

0:14:41.740 --> 0:14:50.400

FR04

So even though in EMS we have all of those lifting and all of those things, but there's not an emphasis.

0:14:51.220 --> 0:14:51.550

INTERVIEWER - MW

Yeah.

0:14:52.310 --> 0:14:53.610

INTERVIEWER - MW

OK. Yeah, you mentioned like

0:14:54.540 --> 0:14:58.140

INTERVIEWER - MW

Bariatric patients saying that six, seven hundred pounds like is that

0:14:58.830 --> 0:15:1.40

INTERVIEWER - MW

How often are you are you

0:15:2.180 --> 0:15:6.360

INTERVIEWER - MW

Or call is going to be associated with something that is like to that extreme?

0:15:7.40 --> 0:15:26.350

FR04

Well, bariatric patients more regularly will have medical problems, right? And so it really depends on the area in which you work. Personally, we used to do a lot of bariatric patients. I have not had a bariatric.

0:15:27.780 --> 0:15:31.750

FR04

For a few months? Probably.

0:15:32.400 --> 0:15:39.270

FR04

Umm, we used to get them very regularly, like at least once a month you'd have

0:15:40.240 --> 0:15:44.880

FR04

Of anywhere between like a 5-700 pound patient.

0:15:46.540 --> 0:15:57.90

FR04

Which we always have extra hands, but also pulling and pushing our cot and things like that make it very difficult.

0:15:57.880 --> 0:15:58.180

INTERVIEWER - MW

Yeah.

0:15:58.830 --> 0:15:59.490

INTERVIEWER - MW

No doubt.

0:16:0.870 --> 0:16:6.750

INTERVIEWER - MW

So what are your thoughts regarding incorporating mindfulness practice into your daily work life?

0:16:8.270 --> 0:16:12.720

FR04

I think it would be an absolutely amazing thing. I think it would be really helpful.

0:16:14.250 --> 0:16:20.890

FR04

I mean I have tried. I tried to get mindfulness personally myself.

0:16:21.410 --> 0:16:22.130

FR04

Umm.

0:16:23.640 --> 0:16:38.70

FR04

Because it's something I have anxiety and so that's something that like, really helps me when I'm anxious, is like breathing techniques and mindfulness and things of that nature. I wish that it was more of an emphasis in the workplace itself.

0:16:38.870 --> 0:16:39.210

INTERVIEWER - MW

Umm.

0:16:40.660 --> 0:16:44.550

INTERVIEWER - MW

So what's been your approach to a kind of how are you going about it

0:16:45.190 --> 0:16:47.950

INTERVIEWER - MW

When you're at work? You sprinkle it in or what's that look like?

0:16:48.450 --> 0:16:51.520

FR04

Umm, I just kind of sprinkle it in when I

0:16:52.280 --> 0:16:56.970

FR04

Can or need to when I feel myself getting overwhelmed or anxious?

0:16:58.290 --> 0:17:19.790

FR04

I really like box breathing and so I will box breathe. Like I said, I am in nursing school and my program is a holistic program and so they actually teach us specific mindfulness routines that you can do in the event of like in the middle of a

0:17:20.690 --> 0:17:28.320

FR04

Weird situation or a rough situation or something where you're overwhelmed or anxious or whatever that you can just kind of do in the moment.

0:17:29.920 --> 0:17:42.460

FR04

I learned a technique where if you're standing, you shift your weight from like the ball of your foot to the heel of your foot, kind of in a figure 8.

0:17:43.820 --> 0:17:50.60

FR04

And it take and all you're doing is swaying, but it actually like helps your body to

0:17:50.540 --> 0:17:59.10

FR04

Umm come back into equilibrium because you're shifting weight and you're not just standing stagnant and that's something that I've done when I'm like

0:18:0.350 --> 0:18:10.990

FR04

In a moment, and I'll just, I'm waiting or I'm standing there or something. I'll just do that and be like, OK, OK, we're good. But it kind of has to be those small, quick things.

0:18:11.150 --> 0:18:11.680

INTERVIEWER - MW

Right.

0:18:11.810 --> 0:18:12.340

FR04

Umm.

0:18:13.550 --> 0:18:13.790

INTERVIEWER - MW

Yeah.

0:18:13.110 --> 0:18:16.200

FR04

That you can do while also in the situation.

0:18:17.320 --> 0:18:23.320

INTERVIEWER - MW

Hmm. Yeah, you mentioned that a few times now saying that it's it's gotta be bite-size you mentioned.=

0:18:24.180 --> 0:18:31.370

INTERVIEWER - MW

And app and that was kind of one of her questions like your thoughts regarding like stress-reduction app during work, do you feel like that's something people could

0:18:32.0 --> 0:18:33.450

INTERVIEWER - MW

Get a, get a grasp on?

0:18:33.770 --> 0:18:42.100

FR04

I think I think it is because right everything is on our phones on that little stupid mobile device that we carry around.

0:18:44.180 --> 0:18:58.410

FR04

And regularly, like in between runs on the way from one to another, I'm looking at my phone just checking things right. And so if there's a very specific

0:18:59.220 --> 0:19:8.490

FR04

EMS, like mindfulness, bite-size like things that you could find in one specific area. That'd be awesome.

0:19:9.650 --> 0:19:9.920

INTERVIEWER - MW

Yeah.

0:19:9.910 --> 0:19:10.570

FR04

Umm.

0:19:11.260 --> 0:19:13.890

FR04

I think a lot of people will right there's

0:19:14.710 --> 0:19:16.860

FR04

Apps are already out there- I have Calm.

0:19:19.290 --> 0:19:25.140

FR04

But it's hard when you have to, like, really find what you want and do it or whatever.

0:19:27.780 --> 0:19:30.770

FR04

But yes, I think it would be helpful.

0:19:32.410 --> 0:19:44.10

INTERVIEWER - MW

Any likelihood if there was some type, because you mentioned teamwork kind on the onset if there was some type of programming that would require a chunk of time where everyone was together?

0:19:44.690 --> 0:19:52.510

INTERVIEWER - MW

But then in between you can have that? Do you feel like that would be something that people would be interested in or is that too idealistic?

0:19:51.50 --> 0:19:54.620

FR04

I think it's something that people would be interested in.

0:19:56.420 --> 0:20:16.390

FR04

I'll say like at my job we have, we have like anywhere from 2 to 7 trucks out which include 2 to 4 people on each truck. And what we do in our downtime is we actually like sit around the city.

0:20:17.640 --> 0:20:35.860

FR04

So we drive our ambulance out to somewhere and we wait for a run because we actually service all of the 270 circle. So we have to kind of be closer to that. And so there's a lot less time in which we are actually all together.

0:20:36.360 --> 0:20:47.810

FR04

Umm, where at certain departments like a fire department or things like that, they have more time at station together to maybe do a workout routine or do this or do that.

0:20:48.110 --> 0:20:55.760

FR04

Umm, I'll say in the private EMS sector it it would be prob- nearly impossible

0:20:56.600 --> 0:20:59.790

FR04

To pull everyone together to do something.

0:21:1.330 --> 0:21:2.720

INTERVIEWER - MW

Yeah, that's good to know.

0:21:5.210 --> 0:21:10.560

INTERVIEWER - MW

Any other barriers to a stress-reduction app that you could envision in a work day?

0:21:12.480 --> 0:21:14.830

FR04

Not that I can think of at the moment.

0:21:17.290 --> 0:21:21.640

INTERVIEWER - MW

What type of information would you think would be important to include in the app?

0:21:23.20 --> 0:21:24.90

FR04

I think it would be

0:21:24.790 --> 0:21:25.890

FR04

Really important

0:21:27.40 --> 0:21:28.360

FR04

For people to like

0:21:29.40 --> 0:21:30.20

FR04

Know that

0:21:31.780 --> 0:21:32.830

FR04

The "how

0:21:33.540 --> 0:21:53.120

FR04

Mindfulness can actually reduce your stress level", not just like ohh well, that's stupid breathing thing, but maybe because we are medical providers, the physiological responses, and that's kind of how I how I got really into it was.

0:21:53.970 --> 0:22:9.280

FR04

Knowing that, oh, this trigger like a deep breathing triggers your parasympathetic nervous system rather than your sympathetic nervous system, and because we work in EMS, we work with that mind of

0:22:10.50 --> 0:22:13.890

FR04

"How is this going to help me medically?"

0:22:15.70 --> 0:22:19.390

FR04

And I think having because a lot of people are just like "ohh, deep breathing helps your stress."

0:22:19.780 --> 0:22:24.460

FR04

Umm, rather than actually explaining the physiological processes.

0:22:25.650 --> 0:22:26.140

INTERVIEWER - MW

Yeah.

0:22:25.580 --> 0:22:30.270

FR04

Umm. And then I think that having it be

0:22:31.250 --> 0:22:35.960

FR04

Very succinct and not where you have to like

0:22:37.780 --> 0:22:41.530

FR04

Find everything you want and you know

0:22:42.310 --> 0:22:42.950

FR04

Umm.

0:22:44.280 --> 0:22:53.390

FR04

Would be helpful because that's something that deters me. It's like I if I haven't listened to something and I don't have a lot of time and I am like-

0:22:54.690 --> 0:22:58.490

FR04

I can't. There's not many where you can just do click breathing.

0:22:59.600 --> 0:23:0.910

FR04

And it walks you through breathing.

0:23:1.550 --> 0:23:2.800

FR04

There's all of the like

0:23:3.400 --> 0:23:8.500

FR04

Full meditations. And then you have to pick what style you want and all of that.

0:23:14.100 --> 0:23:14.580

FR04

Yes.

0:23:11.760 --> 0:23:17.650

INTERVIEWER - MW

Good. Now, sometimes just less is more. You know, here's your thing. Do a- It's gonna be quick.

0:23:47.70 --> 0:23:47.410

FR04

Yeah.

0:23:18.360 --> 0:23:49.510

INTERVIEWER - MW

Interesting. You mentioned about like wanting to know the why, like the science, we found that like few years ago we did a survey and just kind of mapping out the different phases of our program and we're we're shop kind of what we thought people would want to eliminate some of that like teaching segment and get more into discussion or the experiential. But they really love like they people love the science, especially if it's bite size and they're like oh, that connects. So yeah, we found that to be true. Just what you said "tell me why help me connect the dots and then

0:23:49.870 --> 0:23:53.500

INTERVIEWER - MW

It'll give me a little bit more reason to appreciate what it is I'm doing."

0:23:53.840 --> 0:23:59.940

FR04

Yeah, yeah, especially for people in the medical field because our brain works like that anyways.

0:24:1.220 --> 0:24:7.430

FR04

Like I am always thinking of physiological processes even in my daily love life.

0:24:9.620 --> 0:24:10.270

INTERVIEWER - MW

At the house.

0:24:10.550 --> 0:24:13.480

FR04

My husband just gave me a "yes" look.

0:24:14.860 --> 0:24:16.810

INTERVIEWER - MW

Exactly (inaudible)

0:24:15.70 --> 0:24:17.920

FR04

She does it all the time.

0:24:18.920 --> 0:24:19.800

INTERVIEWER - MW

That's great.

0:24:20.600 --> 0:24:30.490

INTERVIEWER - MW

Who should be present in the videos? If you're going to like, pull it up and see a video of someone teaching you something or going through a meditation, do you feel like it needs to be intentional about who's in that video?

0:24:31.470 --> 0:24:32.480

FR04

I don't think so.

0:24:34.70 --> 0:24:34.310

INTERVIEWER - MW

Yeah.

0:24:35.770 --> 0:24:36.700

INTERVIEWER - MW

We've had

0:24:37.560 --> 0:25:1.680

INTERVIEWER - MW

Just to give you some insights behind there. Like you know, talked with five folks and sometimes like they wanna see one of them like one of our peers. I didn't know if in the in this space if it was really that if it could be the professional that knows I mean it could be the yoga teacher that knows what he's talking about or does it need to be the the person in the EMS space that also knows what they're talking about in this deal, you feel like it could go either way.

0:25:2.120 --> 0:25:20.300

FR04

I mean, I think it could benefit it being someone who's been in the field because if you haven't been in EMS, you don't know and that's that's one big thing is like, if you haven't been a first responder, you cannot

0:25:21.430 --> 0:25:25.220

FR04

Umm, sympathize or empathize with a first responder.

0:25:28.110 --> 0:25:43.440

FR04

My [SPOUSE] has seen a little bit of that. [SPOUSE] actually worked as a dispatcher [IN A FIRE COMPANY] and before then [THEY] did not understand a lick of anything. Now I can kind of come home and give [SPOUSE] a little bit.

0:25:44.920 --> 0:25:58.430

FR04

Because he's been in that role slightly, but if I try to talk with my mom or something, she does not understand because no one will understand unless you're put in those situations.

0:25:59.160 --> 0:26:0.720

INTERVIEWER - MW

I see, that makes sense.

0:25:59.870 --> 0:26:12.980

FR04

Because it's completely different than any other situation. And so having somebody who who's talking to you about these things, who's like, "dude, I've been there, I know," rather than someone who's like

0:26:14.150 --> 0:26:18.380

FR04

"This, like yoga move will help with this muscle."

0:26:19.880 --> 0:26:27.700

FR04

And it's like, OK, great. But how is that helping the fact that I had a [YOUNG] child die?

0:26:29.870 --> 0:26:30.270

INTERVIEWER - MW

Right.

0:26:29.880 --> 0:26:33.410

FR04

How? Like you don't understand. You'll never understand that.

0:26:35.500 --> 0:26:36.670

INTERVIEWER - MW

No, I got you.

0:26:38.40 --> 0:26:48.310

INTERVIEWER - MW

Oh yeah, we passed through our questions. Anything else we haven't discussed or any parting words of wisdom You wanna leave us with as we go separate ways?

0:26:49.150 --> 0:26:50.340

FR04

I don't think so.

0:26:52.910 --> 0:26:54.660

FR04

I think- I think that's about it?

0:26:56.340 --> 0:27:0.110

INTERVIEWER - MW

Cool. We really appreciate you taking the time to chat with us.
