

0:0:0.0 --> 0:0:0.400

INTERVIEWER - MW
OK.

0:0:1.560 --> 0:0:2.580

INTERVIEWER - MW
Locked and loaded.

0:0:3.430 --> 0:0:7.780

INTERVIEWER - MW

So the first question I have for you, what does occupational stress mean to you?

0:0:14.280 --> 0:0:15.940

FR10

Overall, I think it's just.

0:0:17.980 --> 0:0:25.530

FR10

Mostly just the stress that originates and comes from work, but doesn't necessarily stay there. It can come home with you.

0:0:28.970 --> 0:0:30.380

FR10

I would say that.

0:0:31.500 --> 0:0:36.760

FR10

It's probably different than most other types of stress because.

0:0:37.550 --> 0:1:5.500

FR10

I mean, your livelihood is depending on it, so you're gonna go to work. You're gonna have conflict, and you're gonna have to learn to resolve it. But if you let occupational stress kind of eat away at you, then it's gonna affect your home life as well. But I think we have to deal with occupational stress a little differently than home stress, because, again, your paychecks dependent on it. And you have to report to somebody who's ultimately your boss. So you gotta kind of, like, balance that.

0:1:7.820 --> 0:1:36.450

FR10

Type of stress differently than stress at home. I mean people have stress at home, they just go grab a beer or go out and hang out with friends. And that's all good. But occupational stress at work is different, like you have to deal with it tactfully and like for a firefighter, I work with six different people. Five other people every day, and there's always some type of stress that comes up. But you need to resolve it because you're going back and you're gonna see those people every three days. So I feel like occupational stress is just a little bit different than everything else because.

0:1:36.580 --> 0:2:6.470

FR10

Umm, it needs dealt with sooner than later. If you have stress at home, you're tired of doing home projects. You just put them off. It is what it is. But if you put off some type of occupational stress or even just like PTSD from work, it's just gonna fester into something more over time. So you just gotta really understand how to just like mitigate that very early on and just get it solved. Like, hey man, you know, you made me, you know, a little bit mad about this. I just wanted to talk about it. So I feel like you have to.

0:2:7.250 --> 0:2:12.980

FR10

Established that early and often, rather than just let it just kind of go away. So I think that's the main difference.

0:2:13.930 --> 0:2:14.460

INTERVIEWER - MW

Yeah, that's.

0:2:15.330 --> 0:2:17.950

INTERVIEWER - MW

That's nice. I like hearing that. Tell us more kind of about.

0:2:18.790 --> 0:2:24.70

INTERVIEWER - MW

Some of the occupational stresses that you've experienced or have had to deal with on a regular basis.

0:2:24.190 --> 0:2:27.320

FR10

Sure. So some of it, it's gonna sound silly, but.

0:2:28.460 --> 0:2:33.50

FR10

I so our our work specifically.

0:2:33.750 --> 0:3:5.60

FR10

More than anywhere else that I know, our Chiefs buy into this whole thing where a lot of people get rotated every two years. So you finally just get a really good bond with your crew, you work, you know, six people on I'm at an outside station. We have four stations. I'm in an outside station. And so there's six people assigned there, me being one of them. So there's five other people. Well, every couple of years, they just rotate people and mix them up just to do it. And they think that it's going to create growth, however.

0:3:5.660 --> 0:3:30.530

FR10

I see both sides of it. I do see growth sometimes, but I also see people it affects them, it affects them personally. It affects them emotionally and they just like if you had a crew you worked really, really well with and you just finally got after about a year and a half, you finally got on the same page. Everything's firing on all cylinders. And then, BAM, we just switch it up and you just you just get put with another crew. I don't feel like people ever truly get, like, settled in.

0:3:32.220 --> 0:3:57.160

FR10

Well, once they do get something, I feel like they just know that the move is coming. So I think that's a type of occupational stress where it's like all of your friends, basically your family. You live with them every three days. They're just getting taken away from you and they just go somewhere else. So I think that that's just the form of occupational stress. And then like, for me personally, with that being said, with those moves, sometimes people are just collateral damage. So we have there's.

0:3:58.370 --> 0:4:29.160

FR10

Instead of dealing sometimes with the problem people, there's a lot of people to get moved in the mix because they can't just point out. Hey, this one guy is not doing well. We're just going to bump him over here. Well, in order to kind of hide that they move like seven or eight people at one time and someone just kind of eats a crap sandwich to do that. But I will tell you some like distress for me is one of those people. The problem children got moved to my station and now I have to deal with that on a daily basis. Overall, there's people that don't work as hard as others.

0:4:29.260 --> 0:4:56.900

FR10

So now I've gotta do twice the amount of work to make up for, you know, the other person. And that just causes stress on its own. Just day after day when you're doing someone else's job while you watch them sit in a recliner chair. You know that that gets old after a while, but sometimes it's just hard because some people are never going to change. And I just had that recently where I tried to, like, think that I could just kind of, like, go against that and kind of like.

0:5:10.420 --> 0:5:10.600

INTERVIEWER - MW

Right.

0:4:59.0 --> 0:5:28.570

FR10

Be a little bit more verbal about it and vocal like hey, why aren't you do anything, but you can't change these people. I mean, it's been like that for the last 25 years. What makes me think that I'm gonna change them now? You just have to just kind of take a step back and go. You know what? I'm gonna go to work, do my job. The best of my ability and not overdo it to try to make up for these people. But you're never gonna change the person like that. So that's just that was just an example of occupational stress I've had just in the last couple months is just like trying to.

0:5:28.840 --> 0:5:37.960

FR10

Get that crew dynamic dialed in when you've got like a a, a low performing person on your crew. You just gotta kind of figure that out.

0:5:39.250 --> 0:5:44.140

INTERVIEWER - MW

That's a great example. I really like that. So I'm curious how.

0:5:52.900 --> 0:5:53.390

FR10

Sure.

0:5:44.910 --> 0:5:56.550

INTERVIEWER - MW

How are you managing it then? Like how long did you try the? I'm gonna be the change this person hasn't had. And then how long have you been taking a different approach? And whatever.

0:5:56.80 --> 0:5:59.810

FR10

So he got moved to my crew in [EARLY THIS YEAR].

0:6:0.750 --> 0:6:34.180

FR10

[IT'S PROBABLY BEEN MONTHS]. I've just tried to like go against it, but we ended up just like butting heads all the time. And then it was just like, I don't even really talk to the guy that much. We just kind of walked by each other and don't say anything. Just kind of did that. And I it's I don't like it. It's unnatural for me to just not wanna talk to somebody, but I just felt like I didn't really have anything good to say. So don't say it at all. That's just kind of where I was at with it. So the resolution to it being I had some other crew members come up to me and say, hey, look, we've noticed that you're high performance level where you always were.

0:6:34.310 --> 0:7:5.280

FR10

Is down here now because you're trying to take this guy on. They're like, let it go because you're down here now with him. What makes you better than him? If you two are just bickering about stupid stuff all the time, you know? So that guy's dragging me down. So I had a couple senior guys come to me and say, hey, look, you need to just, like, not worry about let it go. Come back up to here. So for the past, like, two months, I just kind of let it go. And I think naturally, I've actually gotten along with that other guy better just because I'm not in his business every day, like, hey, man, I don't call him out.

0:7:5.360 --> 0:7:34.930

FR10

Every day like I used to, I used to just be like ohh what? You gotta go to the bathroom while we all go wash the fire trucks. You know, because that's kind of his play call like Ohh. It's time to wash trucks. So I'm just gonna go to the bathroom for half hour and play on my cell phone. It's like and I don't wanna say this as in like this is how the whole fire service is. I think it's just you have these types of people everywhere and you just have to figure out how to do it. It's not just my department. They're all over the place. People like that. And there are few and far between. But when you do get somebody like that, it can be challenging to work with.

0:7:35.480 --> 0:7:39.310

INTERVIEWER - MW

Yeah, it's like you're living with them that that is a different man, so.

0:7:37.560 --> 0:7:54.770

FR10

Ohh, absolutely yeah. I mean, you wake up in the same building, you eat lunch, you eat dinner, you do everything, workout, take emergency runs, everything is like it's no different than just being at home with your family. Sometimes it's and it's every third day, so you gotta really.

0:7:56.610 --> 0:8:28.360

FR10

My approach wasn't the best and I had some people telling me that, but it's just things you live and learn where it's just like I'm just. I'm like, you know what? That's the way that day's gonna be. And I don't worry about it now and my stress has went down significantly since those guys came and talked to me and I that was a hard, that was a hard pill to swallow when someone's coming, like, hey, look, you were here and now you're here. It's like, well, damn. Like, I don't wanna be that guy. You know what I mean? I don't wanna be at that level. So good for those guys that came and said, hey buddy, don't don't try to change this guy. He's been there 25 years. He hasn't changed anything. Why are you thinking you're going to? It's like that's a great point.

0:8:28.960 --> 0:8:34.350

FR10

But sometimes just need that outside voice saying, you know. Hey, look, it's just gave it up. It's not worth it.

0:8:35.670 --> 0:8:38.330

INTERVIEWER - MW

Yeah, great. What um?

0:8:39.510 --> 0:8:43.160

INTERVIEWER - MW

So that's it. I don't consider that an example of like a stress reduction. What other?

0:8:43.960 --> 0:8:47.810

INTERVIEWER - MW

Saying would be helpful for you from a stress reduction standpoint while on the job.

0:8:48.780 --> 0:8:56.800

FR10

The biggest thing for me is and I've struggled with like anxiety and depression and stuff in the past, and this job can really bring that out of people.

0:8:58.660 --> 0:9:29.750

FR10

My go to anymore and I and I know it's like it seems obvious. But diet, sleep and exercise are huge when it comes to that. So I work out every single day while I'm at work. So like yesterday I did an upper workout and then today before I left and before I came home I did a lower workout so I get 2 days of working out and then so I've got the rest of today off and then tomorrow I take a rest day.

0:9:29.820 --> 0:9:55.410

FR10

And then I come back in, I do an upper lower. You know, I do an upper on shift and a lower before I go home. That's four workout days a week and it's not really I don't have to do it on the side when I'm at home, but working out is my biggest stress reduction. But I can tell you if I don't watch my diet and I'm eating a bunch of sugars and a bunch of crap, my body feels like crap and then it makes my mind just do dumb things and not think straight.

0:9:56.630 --> 0:10:2.440

FR10

Which affects anxiety and depression and stuff. So I've really been trying to.

0:10:26.400 --> 0:10:26.650

INTERVIEWER - MW

Umm.

0:10:3.840 --> 0:10:32.490

FR10

Eat like protein and rice for every meal. So like steak and rice or chicken and rice, hamburger and rice, and just maybe a couple carrots. Now we have a personal trainer at work. He comes in, he sees us every three weeks. He comes in every week. But with our schedule, we see him every three weeks. He's real big on the diet portion of it too. So diet exercise, this was kind of his thing is just like protein and rice. Low inflammatory diet stuff.

0:10:45.430 --> 0:10:45.910

INTERVIEWER - MW

You know.

0:10:32.670 --> 0:11:3.340

FR10

I notice a night and day difference with anxiety and stress when I'm on just a really good clean diet. But the minute I start eating all the cookies that all these people bring into the Firehouse like ohh you saved my dad and you know my husband's like ohh great. Here I got a whole thing of brownies. Well, yeah, that's great. I appreciate it, but I start tearing into those. And just for the next couple days I feel like crap. I'm like, why did I eat that stuff? But when I'm at work and I'm on the medic unit, it stresses me out.

0:11:3.410 --> 0:11:18.230

FR10

More than being on a fire truck, I don't know how other people feel about it, but people's lives are like 80% of our fire department runs are EMS and 20% of them are fire. And I think maybe you only get like.

0:11:18.970 --> 0:11:40.380

FR10

Maybe 5 to 10 actual house fires a year, compared to thousands of EMS runs. So if I'm on the EMS unit, I end up eating a bunch of junk all day long just because I think it's just a stress. Like they say, stress spelled backwards is desserts and it's so true because.

0:11:41.770 --> 0:11:58.470

FR10

You just like. I don't know what it is. It's just like I just get in this F it mode and I'm like, whatever. I don't care. I just wanna eat something, you know? I know I shouldn't, but I eat it anyways. And so then I eat something sugary that I shouldn't have, and I end up feeling like crap for it. I'm like, well, why did I do that? It's just get just a vicious cycle that you get caught in.

0:11:59.990 --> 0:12:2.210

FR10

And when we drop a patient off at the hospital.

0:12:3.450 --> 0:12:16.860

FR10

In the EMS room is pop, sugary sweets. All that other stuff is like they're not helping the matter either, you know, but they just go off of what people request. And a lot of people request, you know, a lot of people like pop and sugars, so.

0:12:17.740 --> 0:12:28.740

FR10

I don't know. It's it's definitely different, but diet and exercise are the main stress relief for me on a daily basis. That's what dislike keeps everything just kind of in check for me.

0:12:29.870 --> 0:12:30.370

INTERVIEWER - MW

For that.

0:12:29.990 --> 0:12:59.280

FR10

And then I mentioned sleep. I don't do a good job at it, but I kind of did a little trial there a couple months ago where I set my alarm for the same time every morning to go off at 6:00 AM. And then I tried to go to bed at 10:30 every evening, whether I was at home or work. And I felt really good when I was doing that. But I'm currently going through a promotional process at work right now, so I've been up late studying and stuff, and I haven't been going to bed till like last night. I don't think I ended up going to bed till like 1:00 o'clock I.

0:12:59.860 --> 0:13:30.320

FR10

We was we took a late run, probably around 11 something and then I came back, started reading my book. Next thing I was like midnight and then I was like, yeah, whatever. And I was like one. And then I was just tired. I didn't want to wake up this morning. So when my sleep is off, I mean, that's another effect on mood and everything like that. So definitely top three sleep, diet and exercise. I think that'll solve it all. But there's one of those we can't really control is sleep when you're at work. I could have had better discipline and not read my book last night, but I've still would have been in bed by midnight.

0:13:30.400 --> 0:13:37.360

FR10

I mean, if you take calls in the middle of the night, that's your job. You gotta do it. So there's kind of that's just the trade off, you know.

0:13:46.590 --> 0:13:47.360

FR10

Yeah.

0:13:40.80 --> 0:13:48.680

INTERVIEWER - MW

Not every day you hear something for the first time. Like you said, stress fell backward. Is dessert. I had to run them. I'm like God, he just blew my mind. I'm like, how did I never hear that? I'm gonna use that dude.

0:13:49.290 --> 0:13:49.780

FR10

Yeah.

0:13:49.910 --> 0:13:50.430

INTERVIEWER - MW

Get 8.

0:13:52.340 --> 0:13:58.970

INTERVIEWER - MW

Could you describe you mentioned anxiety a little bit. Can you describe a time, a scenario where you're, like, felt overwhelmed during the job?

0:14:0.590 --> 0:14:10.620

FR10

Yeah, and this obviously isn't even really gonna like from an outside perspective. And sometimes I've explained to other people that have never had anxiety. So I don't feel like they understand it.

0:14:12.940 --> 0:14:15.490

FR10

Like #1, anxiety is a learned trait.

0:14:16.750 --> 0:14:45.300

FR10

No one's born with anxiety, you just you learn it from somebody. So, like I've realized, you know, looking back, my mom had bad anxiety and my dad did too. A little bit, I think. And they always worried about everybody else. What everybody else thought, you know, this and that. And they and that was a learned thing I. And it's like, I wish it was a switch. I could just turn off and just not care. But I think that no one's born with it. You just learn it. And I think just being around it for [NEARLY TWO DECADES] around my parents, that's just kind of like that mindset you just like.

0:14:45.610 --> 0:14:51.470

FR10

I don't wanna have that, but you just like, get this like, anxiety and I don't know, it's kind of weird like.

0:14:52.260 --> 0:14:55.50

FR10

Uh, so days I'm on the medic unit.

0:15:3.420 --> 0:15:3.850

INTERVIEWER - MW

Really.

0:14:55.890 --> 0:15:11.740

FR10

And I know I'm gonna be the one in the back taking care of people. Sometimes I just, like, get this, like, weird anxiety of, like, what if I can't take care of somebody today? What if, like, a baby's choking? I can't, like, save them. It's like I run these what ifs scenarios in my mind. But it's like, they're irrational. I don't understand why I think that.

0:15:13.480 --> 0:15:14.550

FR10

But I just get these like.

0:15:15.850 --> 0:15:38.620

FR10

You know well, if I mess that call may maybe if I mess something up and and I don't take care of this person or someone gets hurt on an EMS run and like I didn't effectively do my job or I didn't follow my protocol or what if I lose my job like you just it's weird how bad it spirals into this like stuff and. And I just have to tell myself on the on the daily basis it's just like.

0:15:40.370 --> 0:15:54.420

FR10

I've never not been able to handle any scenario and I've been doing this for [OVER A DECADE] now, so why is this like anxiety? Like kind of like turning on on days that I'm on the medic unit and it does. I mean it does it on a fire truck. I'm comfortable on a fire truck.

0:16:20.480 --> 0:16:21.150

INTERVIEWER - MW

Thing that.

0:15:55.540 --> 0:16:24.420

FR10

The volunteer department that I worked for, we probably had over 100 fires when I was on their department and I just got comfortable with it like I just felt confident in it and I don't know, it's weird and EMS like I do a good job. I take care of patients. I just don't understand some days why I get that anxiety of. I just like, feel like I'm not gonna be good enough for that day. It's it's really weird. But it it's hard to dial that back, but I think. But I think when I exercise on those days.

0:16:25.150 --> 0:16:40.80

FR10

I try to get in the workout. I tried to get in the workout room early in the morning on those days because I guess those endorphins going and I think it slows that brain process down where you just not thinking about it. You gotta just divert and distract to something else. So that's kind of how I combat that on days.

0:16:41.320 --> 0:16:51.380

FR10

And then stay away from caffeine. I've noticed caffeine will make anxiety and stuff worse too, so I don't drink coffee and things like that on days and all of that helps in turn so.

0:16:52.870 --> 0:16:53.150

INTERVIEWER - MW

Yeah.

0:16:54.60 --> 0:16:57.270

INTERVIEWER - MW

They really came down on that, the lifestyle. I mean, that's really.

0:16:58.250 --> 0:16:58.640

INTERVIEWER - MW

Yeah.

0:16:56.420 --> 0:17:20.950

FR10

Hmm. Ohh. Absolutely. It's huge. And and it's one of those things where it's like, you know, you know, if you save money for retirement, you're gonna retire. Well, but not everybody just does it. You know, it's like everybody knows diet and exercise is healthy for your body, but yet we have overweight people everywhere we go. You know, it's just it's if it was easy, everybody would do it. So I think that's kind of what it comes down to. People just get caught up and.

0:17:21.590 --> 0:17:50.510

FR10

Umm, you know, Firehouse meals. Everybody wants to go quick and easy. I I hear it on cheap and easy. I hear it all the time. And we we shop as a crew. We go to the store in the morning and we buy lunch stuff for lunch and stuff for dinner. So we go to [SUPERMARKET], we buy stuff to cook for lunch, stuff to cook for dinner. And like, yesterday I was off half a day. But when I came in, my buddy that I worked with, he told me what they had to eat yesterday and it was.

0:17:51.120 --> 0:17:59.510

FR10

Like uh, like an Italian sub for lunch and a spaghetti and bread and stuff for dinner. And so you just like.

0:18:0.890 --> 0:18:24.850

FR10

Fire department people are cooking healthy meals every day, so then you're starting to feed your body this junk and breads and inflammatory. And like you, just like kind of go into the cycle of like, that's just the Firehouse is kind of like the place to retreat and just eat crap all the time. Guys, look forward to eating their wings and pizza there and just a bunch of bad food. And. And we've got to change that in order to keep people healthy. So.

0:18:27.940 --> 0:18:34.330

INTERVIEWER - MW

Any, if any, types of like chronic work related pain, maybe deal with or pain.

0:18:33.550 --> 0:18:54.410

FR10

So I always had. I always had bad back pain in my knees, always bothered me before, but I never prioritized working out diet and exercise and never really prioritize that early in my career. So I'm about [MORE THAN A DECADE] into this and I really just started working out about [COUPLE OF] years ago.

0:18:54.480 --> 0:19:13.70

FR10

So I had back pain. I was lifting people improperly. I wasn't doing good lifting technique. My back wasn't strong, so I was just always in constant back pain. I mean, during the day, I would just have to go sit down and recliner for 1/2 hour at a time, just relieve my back pain, or even just lay in my bed and just try to, like, just, like, stretch my back out a little bit. But.

0:19:14.190 --> 0:19:31.510

FR10

Just not knowing that just the food I was eating all the sugars, then inflammatory stuff and then just not working out. And then you go try to lift 405 hundred pound people, you know, from their bed to your cot and get them down out of the 2nd floor of their home to your ambulance like.

0:19:32.740 --> 0:19:53.390

FR10

I didn't take advantage of this. Staying strong for this job and I just lived in chronic, just had chronic back pain because I wasn't doing anything to help it. I just was like, yeah, whatever. It's just the way it is. And like it, it's not really the way it is. I was just too lazy to just, like, put the time and effort into working out to get stronger.

0:19:55.170 --> 0:19:57.560

FR10

So a little bit of back story.

0:19:58.500 --> 0:20:28.680

FR10

I was actually off work [FOR A BIT. DESCRIBES EXACT TIME GAP AND DETAILS OF A MEDICAL SURGERY THE INTERVIEWEE HAD AT THAT TIME].

0:20:29.170 --> 0:20:57.860

FR10

All the way down and they basically sew it up. And so that's like where I'm at right now. And that was a life changing event for me to realize that like you get one body in this life and you have to take care of it because I I didn't take care of it before I ate a bunch of junk, and now I'm very intentional about eating good food, getting rest and exercising because, like, I don't want it to be the way that it was. So now I don't have the back pain and stuff that I did before.

0:20:58.920 --> 0:21:8.350

FR10

Because I'm working out every day and I work my posterior chain so that my posture is just naturally set back and my deadlift.

0:21:9.170 --> 0:21:18.340

FR10

Umm so when I came back, I didn't even deadlift for a year. I just didn't wanna. I have an 18 inch incision all the way down like my stomach all the way down to like genital area.

0:21:19.560 --> 0:21:49.390

FR10

I don't wanna get a hernia, so I just lifted high reps low weight for a whole entire year. I never touched anything heavy. And then in 2022 this year is the first year that I actually started lifting heavy, but I've got my dead lift up to about 400 pounds right now and that right there helps with lifting patients because you're lifting these people up off the ground, you know off, you know, people fall, they're on the floor. But if you get, you know, four people on each corner of your patient and you all can deadlift.

0:21:49.470 --> 0:22:8.650

FR10

400 pounds apiece. You can lift a total of 1600 pounds of person. You know, if you need it. So coming back and just focusing on working out and like my deadlift is good right now, my squats pretty good. My bench isn't the best, but most of our stuff that we need and the fire service is gonna be like lower body muscle anyways.

0:22:9.950 --> 0:22:42.480

FR10

So I'm doing really well when it comes to that and I don't notice that chronic pain as much anymore. And I also supplement with like B complex vitamins, my multivitamin. I do zinc, I do. Magnesium magnesium helps with stress and sleep as well. Magnesium glycinate really helps with like stress and and everything. And then also I take like a a turmeric with like curcumin and that's an anti-inflammatory, like natural supplement.

0:22:42.590 --> 0:23:13.400

FR10

So between all of the stuff that I'm taking, I've had my testosterone levels checked and it's boosted it naturally, so I don't take synthetic testosterone. There's a lot of guys in the fire department that are getting weekly shots to keep their testosterone up. I mean, there's way more than you would think. And I don't want to rely on that because those guys don't care about their diet. They don't really exercise a lot. But like there's factors there that we can do naturally. So that's typically what I try to do first is fix it the natural way. And if I can't do it that way.

0:23:13.790 --> 0:23:36.880

FR10

Then maybe I'll look into it, but I just don't want to be reliant on a shot once a week to stop by this clinic giving me a shot and then great. I can go lift a lot of weight. I don't really buy into that mentality. I just think that if you diet, exercise and sleep and the zinc that I take can help naturally boost your testosterone, I just kind of go the natural route with things right now rather than a synthetic.

0:23:39.130 --> 0:23:41.290

INTERVIEWER - MW

Awesome. So what? Uh.

0:23:42.230 --> 0:23:48.480

INTERVIEWER - MW

What opportunities do you see for incorporating well-being resources into your daily workflow for like an institutional level?

0:23:49.590 --> 0:23:51.640

FR10

Say that again. Sorry, it's kind of faded out.

0:23:51.920 --> 0:23:56.950

INTERVIEWER - MW

What opportunities do you see for incorporating well-being resources into your daily workflow?

0:23:59.710 --> 0:24:2.190

FR10

I so I just wanna make sure that.

0:24:2.900 --> 0:24:10.240

FR10

Are you asking like kind of like what we do on a daily basis to like like what day offer us to kind of deal with things?

0:24:21.20 --> 0:24:21.620

FR10

Umm.

0:24:9.230 --> 0:24:23.80

INTERVIEWER - MW

Yeah, kind of. Are they? What are they doing? Well, this is not even. What are they offering? This is what opportunity you see. In addition to to be nice to hear what they're offering. And then if you see any other opportunities to incorporate additional.

0:24:23.470 --> 0:24:32.770

FR10

So the main thing is though there's not, there's not a lot of emphasis and priority on working out. Our department has an SOG that says you will work out.

0:24:34.830 --> 0:24:46.0

FR10

50 minutes a day or something like that. But here's the thing. We have officers that are supposed to be in charge of these people, that they're not even in shape themselves, and it just gets a free pass. That's why people don't get held accountable for that.

0:24:47.450 --> 0:25:17.10

FR10

It's not the department's fault from the top. I mean, maybe it is. Maybe if you know that the if you know you have roles and are not being followed and you turn a blind eye to it, maybe it is the top's fault for that too. But I think it's gotta be handled at a company officer level. If your guys aren't working out and

you know, I think that that's on the company officer to say, hey, look, this is what we need to be doing every day. Focus on you being a priority and staying in shape because that's gonna help everybody else, you know, and it's gonna help the way we do things.

0:25:18.620 --> 0:25:48.30

FR10

So our department has that, but they also over schedule us so much that you don't have a lot of time to fit those in. So they say, hey, we want you to do this, you need to do this. But we're also not going to give you the time to do it like figure that out on your own kind of thing because there's been days on when I was at another station that, you know, I would get interrupted four or five times in the middle of a workout. I would workout, take a run, come back, try to do it again, take another run. You just say I'm done. I'm not doing this for the day.

0:25:48.100 --> 0:25:59.330

FR10

I've literally tried four and five times to get it done and you just don't have time to do it. So I think there's times where we say, yeah, we want you to do this, but the times is not there. A good example of that is.

0:26:0.220 --> 0:26:1.660

FR10

Every Thursday.

0:26:2.990 --> 0:26:32.340

FR10

We have a guy that comes in. Our personal trainer comes in and he does an hour each station and that's very beneficial. I'm glad that we do that well. On top of that, they just they did a trial recently and they said, hey, we're gonna bring yoga into the Firehouse. We're gonna bring some yoga instructors in as anybody interested in doing this. So they said on a SurveyMonkey and people said, yeah, we're interested in doing yoga. If people came in, they came in for, like, one week for our crew the next week for the next crew, the next week for that crew.

0:26:32.470 --> 0:26:33.40

FR10

And.

0:26:33.870 --> 0:26:46.480

FR10

They did a trial, they got feedback and said, hey, does everybody like yoga? So that all like, yeah, that's fine. So they decided to contract with these people that did yoga. But the issue is they put the yoga instructor.

0:26:47.380 --> 0:26:48.950

FR10

The same time.

0:26:51.270 --> 0:27:21.840

FR10

At the same day and time as our workout guy. So I say same time, but it's within an hour or so. Our workout guy comes in from 9 to 10 and then they scheduled yoga from 10:50 and that's just not the time to do that. Like our fitness guys like, they need to have that Lady come in on Monday, get you guys all relaxed, get like everything just kind of like stretched out and then we lift on Thursday, not lift on Thursday and then do yoga after you already tired from your workout. The last thing you really want to do is yoga.

0:27:22.200 --> 0:27:22.560

INTERVIEWER - MW

Really.

0:27:40.300 --> 0:27:40.720

INTERVIEWER - MW

Right.

0:27:23.280 --> 0:27:49.120

FR10

You're pumped up for the day. You're feeling good. You worked out, and then you have a yoga lady comes in there and they're working on resting. I, you know, stuff like, just like restfulness and things like. That's like, I don't know, to me, you just boost your testosterone just to go into another room soon as he leaves to go try to fall asleep, you know, like, I don't know, it's it's different. And that's not just my opinion. That's just kind of going off of both of theirs, the yoga instructor. She tried to get it on a different day, but our department.

0:27:49.790 --> 0:28:0.930

FR10

I think it's easy for them to say, well, we offer everybody yoga and we offer everybody Wellness. But again, where is that time fitting in? They're so involved with adding like administrative tasks and getting their stuff done.

0:28:1.750 --> 0:28:11.550

FR10

I think it's easy to say, yeah, we give the people, you know, these programs, but I don't think they efficiently like put it into our schedule where it's gonna maximize the benefit for both of those programs.

0:28:13.960 --> 0:28:19.430

INTERVIEWER - MW

Any other barriers you see along those lines for incorporating well-being resources.

0:28:22.560 --> 0:28:22.830

INTERVIEWER - MW

You know.

0:28:20.930 --> 0:28:24.480

FR10

Cost, I think at the end of the day, I think that.

0:28:26.770 --> 0:28:55.200

FR10

I think it's just the as an administration and I think on an individual level, how many people do you know that they don't buy a gym membership and they don't eat healthy because it's expensive? They don't look at it as if you're just basically paying to prevent the cardiovascular surgery that you're gonna have in the next 10 to 15 years anyways. And all the drugs and doctors appointments, that's all gonna add up. I just think sometimes it's a mindset and people just don't have their priorities straight.

0:28:56.150 --> 0:29:25.530

FR10

I think just in the cost perspective, they probably just the Township wants to save money and they don't provide all of these resources just to save a buck. But guess what? On the back end, your insurance premiums are going to be higher because you've got people that are a little bit more sick because they're not staying as healthy. So I don't know. I'm one of those people where you pay today for tomorrow's success. I'm like a more of a build your foundation and I'm a long term like thinker.

0:29:25.620 --> 0:29:51.300

FR10

And I look long term for goals, there's a lot of short term thinking and short term goals where your Fire Chief says well, I just wanna save money. Trustees don't wanna spend it on this right now and they like, let it go. I don't really buy into that. I'm more of a like long term like look, This is why it's important for this and here's what we save over time. Now that comes down to like data collection too like can you show that on paper that these programs are gonna benefit?

0:29:52.550 --> 0:30:2.500

FR10

You know mental health because if we focused on Wellness and we focused on that on a daily basis, you might not have the amount of people and EAP.

0:30:2.560 --> 0:30:19.260

FR10

These and and needing mental health resources, I think we could prevent that way before it even starts. It's like, yeah, great. We have an EAP, but what are we doing to prevent people from leaving the EAP? I don't think that we do and it's not just my department it's it's.

0:30:20.910 --> 0:30:25.20

FR10

It is all over the whole entire country. It's definitely in Ohio.

0:30:26.310 --> 0:30:38.940

FR10

Fire Department has a really big culture issue. They just like to do the way they like to do things the way that they've been doing for the last 50 years and it's just not good. National Fallen Firefighters Foundation has like.

0:30:40.100 --> 0:31:9.550

FR10

I wanna say it's like 15 life saving initiatives to like combat suicide and things like that in the fire service. And number one is culture change. That's the number one thing. We've gotta change the way that we've looked at things and the stigma that comes with people that have these. You are always told, basically suck it up. It doesn't matter that call was rough, but you just suck it up. You know, you don't want to, like, show people that you have these, you know, thoughts in your mind and just that trauma that you see, it was always just like you're fine. You're you're.

0:31:9.700 --> 0:31:29.650

FR10

You know, just it, that's just the way it is. It's part of the job and I know it kind of got down a little bit of a rabbit hole there, but I just don't think that we focus enough on preventing this stuff up front because of cost. But yet I think the cost long term is gonna like totally be more expensive than it what it was just to prevent it in the beginning.

0:31:40.550 --> 0:31:41.200

FR10

That's fine.

0:31:30.680 --> 0:31:41.570

INTERVIEWER - MW

That's great, man. I was loving it. I'm like, I don't know what promotion opportunity you're going for, but you're ready. And here. I'm like this dude. Ready. He's speaking to the administration. I'm ready to do something for you. I like it. Need to take that to the top.

0:31:43.470 --> 0:31:57.450

INTERVIEWER - MW

Great. You mentioned before we get into the mindfulness questions come out eating and you said mentioned something like cheap and fast like how's that work like you guys have a bug like what is the budget for food? Like how what's that processing like?

0:31:56.560 --> 0:32:31.420

FR10

[DESCRIBES THAT THE DEPARTMENT HAS 5-6 PEOPLE WORKING EVERY DAY AND THEY COLLECT MONEY AND HAVE ONE COOK FOR ALL AS A DAILY RITUAL]

OK, it's possible. It's definitely doable. I can do it fairly easy, but I'm also my cooking skills are are pretty decent and that's not an ego thing or anything like that. Not bragging when you learn to cook good Whole Foods and healthy stuff. Most people think that it's more money, but I think sometimes people look for more of a prepared style meal and something that's easier because they don't. They don't have the ability.

0:33:2.80 --> 0:33:7.830

FR10

They do have the ability. I just think they don't wanna go out on a limb and like, increase their cooking skills, whereas for me.

0:33:8.230 --> 0:33:26.600

FR10

Umm, I can buy a bag of rice that's really cheap. I could really incorporate in both meals, but I'm a big fan of like, I'll buy even just like a bag of potatoes and I can cut up. I don't buy bag French fries. Other people buy bagged French fries were getting all that crap in there. The preservatives and everything else like that.

0:33:27.820 --> 0:33:56.640

FR10

And it's expensive sometimes for that, but I like to just go with a bag of potatoes and I cut them up and I just put olive oil on them. Some salt pepper. You know, things like that. And I make up my own fries, and then I just, like, tried to do a meat. So I'll just buy, like, a flat of chicken breast, cut it up, season it, put it on the grill. So we're gonna have some, like, maybe some chicken, some fresh cut fries and a vegetable. Usually just try to do. I try to do a fistful of protein, a fistful of vegetable and a fistful of, like, carb and typically.

0:33:56.900 --> 0:34:29.580

FR10

I've been staying away from potatoes a little bit lately, but I tried to go like sweet potato or something. Just get a complex carb rather than a simple carb, but I can cook for the crew with 50 bucks, but there's some people. Ohh my you give him 50 bucks and you're gonna be eating hot dogs for lunch and brats for dinner, and you're gonna have a bag of lays potato chips as your side for it. And I mean, that's your meal. And some people. That's what I'm saying by like, cheap. Quick and easy. They buy hot dogs or brats. So I'm on the grill. Then they bought 2 bags of potato chips to just eat along with it. It's like, yeah, that's great.

0:34:29.690 --> 0:34:35.960

FR10

Like for you guys that you wanna just go cheap and easy, but I'm not buying into that. I take my own meals to work with me.

0:34:38.220 --> 0:34:52.710

FR10

I pre make my I make my meals at home and I just put them in a package and I take them to work with me and then I can kind of make that decision. I can make a game day decision of hey, who's cooking and what are you cooking? And if they say hey, this is what I'm gonna do and it sounds healthy, then I'll say, OK, I'll buy in.

0:34:52.950 --> 0:34:59.360

FR10

Umm. And then? If not, I just eat my own packaged meal that I take to work. It's usually just like.

0:35:1.190 --> 0:35:11.370

FR10

Ground beef and some rice and some carrots or something just because like that's what after surgery, my body needs good foods. I can't really eat the junk anymore.

0:35:12.530 --> 0:35:31.580

FR10

It can cause a little bit of controversy whenever someone's like. Ohh, it's funny. You wanna buy in once you find out what we're making and not before. And I've just explained to him like guys. I can't. I can't eat that crap. I can't run it through my system. It's not. It's not good for me and I don't wanna get sick again because if I get sick and my current.

0:35:33.50 --> 0:35:40.110

FR10

[DESCRIBES MEDICAL CONDITION AS A RESULT OF THE SURGERY AND ITS EFFECT ON FOOD CHOICES].
Like I just that's gotta change and you gotta focus on good nutrition. If you don't have good nutrition.

0:36:14.910 --> 0:36:18.920

FR10

Again, as I said earlier, everything else is just gonna shift negatively from there.

0:36:19.780 --> 0:36:20.170

INTERVIEWER - MW

You know.

0:36:21.60 --> 0:36:25.480

INTERVIEWER - MW

What are your thoughts regarding incorporating mindfulness practice into your daily work life?

0:36:26.680 --> 0:36:32.250

FR10

Umm would you think that like yoga is something like that? Is that what would you say? Like the mindfulness stuff?

0:36:32.540 --> 0:36:34.310

INTERVIEWER - MW

That's a practice. Yeah, that's a form of it.

0:36:34.170 --> 0:36:56.430

FR10

So far I've done about two sessions and I've liked doing it. I really have. I think it's beneficial. I think the reality of it is, is that if your department doesn't prioritize that time for you to do that, then it doesn't really mean a whole lot for it. You know, it's one thing to say that you do it, but are you actually backing that up with like, this is our priority. We wanna do this.

0:36:57.850 --> 0:37:19.380

FR10

And then you have that other thought where you start. This happened probably three weeks ago. We were right in the middle of doing the yoga and we took a fire department run and just like kind of interrupted the whole entire session. You know, so that kind of that kind of sucked. But that's just the way it is. That's our job where there to help the public when they call, we respond. So.

0:37:20.900 --> 0:37:40.820

FR10

That's understandable, but if we could do something like that on a like, even just a weekly basis rather

than every three weeks, I heard a department that neighbors us does it twice a week. Those those women come in and do theirs twice a week. I think that's beneficial. I would definitely, you know, love to see that incorporated into our.

0:37:42.40 --> 0:37:43.500

FR10

Into our daily routine.

0:37:45.640 --> 0:37:49.550

INTERVIEWER - MW

What about? What are your thoughts regarding like a stress reduction act during work?

0:37:52.790 --> 0:37:54.420

FR10

So for me.

0:37:58.30 --> 0:38:12.160

FR10

It would be hard to speak because I don't know what all that's gonna entail, and I think every every one of those can be different. I've tried to do like the call map before. I don't know if you're familiar with that, but like you can put on like sounds and stuff.

0:38:13.30 --> 0:38:28.220

FR10

It just doesn't do it for me. I love to sit here and say ohh yeah, it works great. I just. I didn't find it that like relieving for me to do. And I think my mind is always like I I'm kind of 100 mile an hour up here and it's hard just to like.

0:38:28.970 --> 0:38:37.20

FR10

Umm, it's hard just to sit down and just like, listen to the the calm app and like just let that stress go away.

0:38:38.160 --> 0:38:39.250

FR10

I get a better.

0:38:39.930 --> 0:38:42.510

FR10

Stress relief just going to work out and just.

0:38:43.780 --> 0:38:52.220

FR10

Like intentionally turning that off in my mind and getting that physical just like release rather than just like, listen, I have had success.

0:38:53.580 --> 0:39:23.890

FR10

With an app like that for anxiety through the Cleveland Clinic, I was going through some some really bad

anxiety up there because I was getting so much pain from everything I was going through that I was just almost just like a PTSD of how bad the pain was. And I knew I was gonna be in that same pain going forward. And they had a, like, psychologist up there that she met with me and we would talk about some things. And they have an app. The Cleveland Clinic has like, a A.

0:39:25.110 --> 0:39:43.640

FR10

I think it's actually on their website and she created a shortcut on my phone desktop that I could pull it up and I would listen to her like 10 or 15 minute videos and she would just like talk to you through breathing exercises. And she'd say, man, I'm trying to remember what it was. This is about two or three years ago now.

0:39:46.720 --> 0:39:56.920

FR10

She would just talk you through breathing and like just thinking about things to take your mind off. Whatever was going on. And there was one that was a.

0:39:57.770 --> 0:40:28.400

FR10

Like a couple days before your surgery. And then there was one that she's like, listened to this at half hour before you go into your surgery and just calm your mind down. And man, they worked. I mean, they really did so, but it it wasn't necessarily an app. It was. It's something through their website that you just like, click on. I think it's under, like behavioral resources or something. And I would just like, listen to that, do her breathing exercises and just get my mind to shift away from what was about to come. So it definitely does have its benefit. I just haven't seen anything.

0:40:29.350 --> 0:40:30.140

FR10

That can like.

0:40:30.870 --> 0:40:42.370

FR10

I can focus in on and say Oh yeah, that absolutely works within the past couple years. Again, I've just working out has been a very good release for me, so I've just been kinda staying at that avenue right now.

0:40:41.980 --> 0:40:42.400

INTERVIEWER - MW

You know.

0:40:47.710 --> 0:40:48.220

FR10

Umm.

0:40:43.400 --> 0:40:57.10

INTERVIEWER - MW

As you think about your experience with calm versus the Cleveland clinics you know website, what made

you want to use what Cleveland Clinic was doing versus not really being excited about Calm? What was that different?

0:40:57.440 --> 0:41:1.930

FR10

So calm and maybe I just didn't like look into it too much calm was this like?

0:41:16.590 --> 0:41:17.0

INTERVIEWER - MW

OK.

0:41:2.880 --> 0:41:20.710

FR10

I notice that they had this like a lot of sounds and like soothing stuff like rain coming down and things like that. And so like I I did, I listened to those and just like listening to the rain coming down. So if that doesn't like, do it for me, whereas the Cleveland Clinic? Theirs was like intentional and.

0:41:21.890 --> 0:41:35.20

FR10

Like it forced me to do their breathing exercises and things like that. Now, maybe Calm had that. I didn't really play around in the free version very much, so I didn't see, you know, anything like that, but.

0:41:36.150 --> 0:41:42.850

FR10

I am have a little bit of trouble remembering what all was on the Cleveland clinics, but like I said, I know somewhere like.

0:41:43.850 --> 0:41:53.500

FR10

Pre surgery and some of them were like post surgery and it was. I just remember it working because whatever whatever it was, it definitely.

0:41:55.900 --> 0:41:58.30

FR10

Brought that level of anxiety down.

0:42:0.670 --> 0:42:7.950

INTERVIEWER - MW

What are some of the barriers that you see using the stress reduction app like this, or we're talking about during your work day?

0:42:9.660 --> 0:42:14.710

FR10

Uh, I think it goes back to I think.

0:42:18.770 --> 0:42:23.230

FR10

Sometimes I feel like our our department especially has.

0:42:24.10 --> 0:42:47.200

FR10

Way more administrative things going on than any other department that I've worked for. So I think time in general, I feel like if I would just go lay back in my dorm and fire up that app, I always just feel like in my mind at 100 mile an hour that the phones either gonna ring or someone's gonna need this done, or someone's gonna need that done. I don't feel like we ever just get time.

0:42:47.990 --> 0:43:20.60

FR10

And I know we do. It sounds exaggeration, but like I just don't feel like we just get that down time that I feel like people should have. It was always looked down upon that someone would go to their dorm at 2:00 o'clock in the afternoon and try to take a nap. And I just don't buy into that. Rest is one of the most important things and we don't prioritize that. And it was always like, well, what are you doing taking a nap? It's like, cuz I wouldn't be worth a damn at 2:00 o'clock in the morning when we get a call, you know? Like I just wanna be rested. And so that's what I feel is gonna be the biggest challenge with.

0:43:20.860 --> 0:43:22.760

FR10

Something like an app is.

0:43:23.730 --> 0:43:49.960

FR10

Are you gonna have time to use it? And are you gonna have time to actually fully disengage your mind into what it's trying to do without having these outside factors of two people are walking by, they're asking you a question about this. Hey, did you check this out on the medic? Hey, did you make sure there was water put in the fire truck? Hey, we got to go to the store. Hey, someone called. We got to take this truck down for maintenance. It never ends. I just feel like it's always 100 mile an hour.

0:43:52.670 --> 0:44:22.240

FR10

That would be the biggest thing for my current department and we are so much just busier with this odds and ends things. Hey, there's a Boy Scout tour coming in at 6:00 o'clock there's a birthday party. You gotta clean up the station. There's it. Just it never ends. Hey, some kid wants to have a truck at his house for his birthday party. And when you look at our daily schedule, we're just, we're overbooked. Our department prioritizes a lot of emphasis on just getting out, being seen by the public. But I think to their detriment.

0:44:22.310 --> 0:44:50.980

FR10

And I'll figure it out eventually. I think on the back end, you're just wearing your people down. That again, what are you doing to prevent people from needing the in the EAP? You're not letting people rest, you're working them. The death from 8:00 AM to about 8:00 to 10:00 o'clock at night and no other department that I've worked for has done that much to people all day long. Every other department that I worked at was just kind of like, hey, get your work done, make sure you get your truck checks done in the morning. Take care of what needs done. And then just kind of like.

0:44:52.580 --> 0:45:7.710

FR10

Make sure the station's clean, but you know, take some time for yourself throughout the day if you want to get it to 2:00 o'clock nap, you just gotta 2:00 o'clock nap. It is not like that. Where I'm at, I think you're pretty much expected to be on your feet moving for most of the day, and something is always going on.

0:45:8.830 --> 0:45:16.280

FR10

So I don't feel like the app is gonna be effective at my current job unless it was a priority of.

0:45:17.790 --> 0:45:47.700

FR10

Every day, all employees get a break from one to two to just do whatever you know they wanna do to just. Whether that's rest. That's yoga. Just relax. Whatever you need to do until that becomes a priority, they're just gonna keep slamming more stuff on our schedule. And that's why the yoga and the Wellness is all in the same day is because our schedule is so full. They've even said that. Hey, sorry. Yoga's on this day, we don't have another day for it. Well, like, what does that tell you? We're so overbooked right now.

0:45:47.800 --> 0:46:11.950

FR10

And you're trying to get 100% out of your firefighters every single day, and people are tired. That's why people are. And you know, we've got people retiring at like crazy rates right now, no one wants to be around no ones really hanging out with coworkers on the side. No one wants to come in and do the extra curricular and just extra stuff, the special events.

0:46:13.290 --> 0:46:17.70

FR10

People are burnout. That's what it comes down to. It's really just burn out.

0:46:17.860 --> 0:46:29.860

FR10

Are only true rest day is Sunday. They don't schedule training on Sunday and they're like, hey, Sunday is kind of your day. Even though they say that.

0:46:30.940 --> 0:46:37.930

FR10

Shit always gets put on to Sunday because it didn't get done on Thursday. You know what I mean? So.

0:46:52.140 --> 0:46:52.470

INTERVIEWER - MW

I.

0:46:39.400 --> 0:47:10.470

FR10

But one day a week, why everybody, we always look forward to Sunday. It's like, ohh, maybe we might get a rest every day I go in on Sunday and like Oh my God, I hope I get a nap today. Like that's all I think

about on Sunday. I don't wanna take a Sunday off because I just wanna go into work and that be my day that I don't have 100 freaking things going on. I why can't every day be like that. You know what I mean? I mean, I know we gotta do training and stuff, but OK, let's do our training in the morning every day and just get it done and out of the way. And and they don't though.

0:47:10.680 --> 0:47:28.670

FR10

They wait till the afternoon and they schedule it right at lunchtime. So it's like, hey, you eat lunch at 12, training from one to four or something. You're like, well, shit. You know, you're tired during the training. You're trying to digest your food. And then after that, then they scheduled something else from 6 to 8. You got a Boy Scout tour. It's just like I said, man, it just it never ends.

0:47:30.440 --> 0:47:43.170

FR10

I don't feel like the app is gonna be of any use to my department right now, and I hate to say that because I would like it to. I just think until the attitude and the mentality changes of.

0:47:44.460 --> 0:47:47.780

FR10

Putting health and Wellness at the top of the list.

0:47:48.630 --> 0:48:12.540

FR10

And not the very top because I understand the administrative side of it like we came in there and you know, set an oath that we would take care of the public. So obviously we have to train, we have to do these things that matter. But you gotta have health and Wellness right in behind that because people aren't healthy and they're not. Well, they're not gonna be able to do all that other stuff efficiently and effectively. And my personal opinion so.

0:48:13.580 --> 0:48:22.190

FR10

I mean, that's all. That's all I would I would say about it. I would like to see it be successful, but I just don't think that we have the buy in from the administration side of things that.

0:48:23.380 --> 0:48:36.890

FR10

That they're like, ohh hey, here's just a free 2 hours of your day to just like just, you know, to to just get your mind right. But it's an old culture thing. You know, the Chiefs are all older. They don't really. I don't think they really, truly bought into that idea of.

0:48:39.440 --> 0:49:0.100

FR10

I don't, I don't think a lot of people just understand mental health unless they they, especially if they've never had it before. Some people that don't have anxiety, they don't have depression, they don't know what it's like for people with anxiety and depression. They just say, oh, well, you know, that sucks and you know, well, we're here for you. Well, I get it. You can say that. But what are you doing that shows those actions, you know?

0:49:4.820 --> 0:49:5.200

FR10

Umm.

0:49:12.770 --> 0:49:13.260

FR10

Sure.

0:49:1.340 --> 0:49:14.490

INTERVIEWER - MW

Yeah, I mean this is good to hear because that's the thing. That's why we want to have these interviews, because we don't we we understand, you know, you have like systematically there they gotta be some tact of to make these things work. So this has been all going we should all go.

0:49:14.860 --> 0:49:15.260

FR10

Chair.

0:49:15.180 --> 0:49:22.520

INTERVIEWER - MW

So there was an app. What type of information would be important to include in there in your opinion?

0:49:22.910 --> 0:49:27.160

FR10

Umm, so I can tell you based off of like the stuff that I did.

0:49:27.940 --> 0:49:29.330

FR10

I think UM.

0:49:32.590 --> 0:50:7.440

FR10

I think it's just gotta be separated into sections. Like, what are you going through? More or less like, is there a depression section? You know? Did you just have a loss in the family and you just need some like, whether it's good resources to read like just a quick article for like, a three to five minute 3 to 5 page article, maybe of just like how to cope with that, how to get over it or like an app that like, can separate. Hey, what is it? So mine. I'm gonna go in and be like, hey, it's anxiety today. Well, then here's a list of things that we can do is like, hey, there's breathing exercises. I'm gonna get coached through some breathing exercises and maybe I can just, like, get.

0:50:12.590 --> 0:50:12.790

INTERVIEWER - MW

OK.

0:50:7.510 --> 0:50:15.280

FR10

My body breathing is the number one way to get your body to calm back down. You've gotta just work on different types of breathing patterns and things like that.

0:50:15.460 --> 0:50:27.920

FR10

Umm I noticed like like a box breathing pattern for me. Like just inhale for four seconds, pause for four seconds, exhale for four seconds, pause for four seconds. That's called box breathing.

0:50:29.460 --> 0:50:47.890

FR10

If I focus on that, just in general, just every once in a while or instructional situations, your body starts to understand that and does it more often and you can handle stress a lot better because of those breathing. So I would like to see some just even breathing exercises and just just the way that she would talk through the lady.

0:50:48.800 --> 0:51:16.210

FR10

So the lady that talked to me at the Cleveland Clinic, it was her video. She's the one that put those together. So it was her voice and she would just, like, talk through the exercise that you were doing and the breathing that you were doing. And like, what you what you were thinking about that to me, was helpful. I would like to see that out of an app where I know that I can just go in and do a quick 5 or 10 minute video of just to try to help relax my mind. I think time is important.

0:51:16.910 --> 0:51:48.240

FR10

So what whatever your resource is, I think it has to be quick. I don't think anybody like for me, I don't wanna fire up 1/2 hour app to try to relax and I know that sounds bad because it's like if you need it you should be doing it. But for me my attention span is this not there for that type of stuff. I'm not like like I said, I'm physically. I like physical activity. Let's go out and play basketball. Let's go play football. Let's go work out. It's hard for me to take everything going on here 100 different directions and just like.

0:51:50.970 --> 0:51:58.940

FR10

Slow down. Breathe. So I would be looking for maybe like a 10 minute video or something. I wouldn't say anything over 10 minutes.

0:51:59.390 --> 0:52:3.510

INTERVIEWER - MW

OK. Yeah, that's great. Now as far as like if we wanna have videos.

0:52:4.220 --> 0:52:6.850

INTERVIEWER - MW

Who should be present in the videos you're going to watch?

0:52:8.790 --> 0:52:10.30

FR10

You say who should be.

0:52:10.350 --> 0:52:11.120

INTERVIEWER - MW

Yeah.

0:52:11.700 --> 0:52:12.390

FR10

Umm.

0:52:17.600 --> 0:52:43.750

FR10

I think with anything, whoever it is is going to have to have some kind of like just professional like credential to them. Like you're gonna have to buy into it. You know, a physical trainer that comes to our work has broke world records I buy into that. The guys never had a major injury and he's broken world records and he's [CLOSE TO FIFTY] now and he's in great shape. I buy into that. Whoever's gonna be doing your videos on like mindfulness and.

0:52:44.100 --> 0:53:1.390

FR10

Stress relief. I listen. This sounds really bad, but I think you can appreciate the honesty. I don't want it to be a 300 pound person that's telling me how to do this and how to like, live better and be well like I think it's gotta be somebody that represents and truly believes in their heart. This is this is a.

0:53:2.750 --> 0:53:5.600

FR10

A way to help you so.

0:53:5.670 --> 0:53:16.150

FR10

So I think it's gotta be someone that's like in decent shape that you have that credential and someone that I can buy into, you know what I mean? Like, I don't wanna.

0:53:16.820 --> 0:53:18.730

FR10

Uh, if if our.

0:53:19.830 --> 0:53:36.460

FR10

But I'll give you an example. The lady that comes and does some physical therapy stuff for us at work, she always tells me like, hey, you need to be doing these exercises and hey, you're postures not good. And yeah, did you see the? I'll show her video of me, like doing squats or something and should be like ohh well, look your knees doing this and send that it's like.

0:53:38.120 --> 0:53:42.270

FR10

Yeah. I appreciate the feedback. And she is so intelligent, but I mean.

0:53:43.470 --> 0:54:13.100

FR10

She's definitely overweight and I and that wasn't necessarily just me thinking that, but I've also talked to some other people said, hey, do you listen to what she tells you and the guys are like, if our exercise guide tells us this, the guy that broke all the world records and our physical therapy lady, Lady says this,

we typically go with him just because of like, he is in great shape. He's done all of this. It's it's just hard to buy into that.

0:54:14.100 --> 0:54:24.850

FR10

And I'm telling you, this is just out of honesty. Who am I looking for in a video? It's just someone that I truly I have to look at them and believe that they're actually their hearts and what they're trying to tell you to do.

0:54:25.350 --> 0:54:25.650

INTERVIEWER - MW

Yeah.

0:54:27.220 --> 0:54:27.770

INTERVIEWER - MW

Beautiful.

0:54:31.400 --> 0:54:32.330

FR10

Oh OK so.

0:54:28.710 --> 0:54:33.670

INTERVIEWER - MW

My man appreciate your time. That wraps us up. This is this is gold, this is gold.
